

GEMSAS Deakin Adjustment (Bonus) Document Guide

The below information details the expectations that GEMSAS has regarding the bonus documentation that you will submit via email. Please read this guide carefully as it is **imperative** that your documents meet the required standard for your application to be processed in a timely manner.

- **Note** the email address to send the documentation to on the Coversheet, as it differs.
- All documentation emailed **MUST** include the relevant coversheet. **Documentation without a Coversheet will not be assessed.**
- Do not combine bonus documentation, i.e. one scanned document per bonus is required (if multiple bonuses are applied for).
- The appropriate Deakin coversheet should only be included once in the email. If sending multiple Deakin bonuses in an email, please combine documentation per bonus (i.e. one scanned document per bonus) with the appropriate coversheet.
- Ensure that the scanned documents are clear, easy to read and in full-colour. They **must** be fully legible, including any notes, codes, letterheads or logos.
- Phone applications can be used to scan your documents (e.g. Cam Scanner, Adobe Scan) but askew or poor quality scans will not be accepted. Ensure that the entire document is scanned, without scanning external surround such as table tops or a frame or your fingers. The document needs to fill the entire space and all edges of the document must be visible. The documents must not look warped by the scan.
- Supply documentation in PDF or JPEG file formats **only**, 5MB limit. **Word documents (.doc, docs, .rtf) are not accepted.**
- Screenshots, photos, certified copies, unofficial results and online printouts are not accepted.
- Ensure that documents are not encrypted, or password protected.
- Ensure that documents meet the type and size requirements as per above.
- Documentation should only be submitted once.
